

Rolled Storage Bag for Sticks**PHOTOS**

Dimensions: (1480x2700) mm
Weight: 2.8 kg

Length and weight tolerances are $\pm 2\%$. Due to continuous product development, product appearance may differ slightly from that shown in the photos.

CHARACTERISTICS

The case is made of polyester fabric coated with a water-resistant PVC layer. It fastens with metal snaps. The case includes three internal pockets for organizing and transporting telescopic pole segments, two pockets for segment end caps, and two pockets made of reinforced transparent film for storing items such as instructions. The case is equipped with four 30 mm wide polypropylene webbing fasteners with buckles to secure the equipment. The case has handles for manual transport and an additional, adjustable-length shoulder strap. Both handles are made of 30 mm wide woven polypropylene webbing.

APPLICATION

The case is designed for proper protection, transport, storage and sorting of telescopic stick segments.

STORAGE AND MAINTENANCE

Transport case should be stored in a way that protects them from mechanical damage. Store the bags in dry rooms, away from heat sources, in a chemically non-aggressive atmosphere. Protect against sunlight.

Bags should be cleaned after each use. For cleaning, use a cloth dampened with water and a mild detergent. Dry at a temperature not exceeding 50 °C.

EXAMINATION

Before placing the rod segments in their case, remove any dirt. Periodic inspections, consisting of visual inspections, should be performed once a year. The inspection includes checking:

Rolled Storage Bag for Sticks

- The exterior and interior surfaces of the case should be clean, free of abrasions and other visible defects.
- The carrying handle should be intact.

A damaged, heavily worn, or dirty case should not be used to transport telescopic poles. If the case becomes damp (especially on the interior), dry it thoroughly before placing the pole segments inside. A damaged, heavily worn, or dirty transport bag cannot be used to transport the tools and equipment in live works. In case of moisture, the bag should be thoroughly dried before use.

FREQUENCY TESTS

For check and periodic inspection to be carried out in according to table.
