

Protective case for storing a torque wrench**PHOTOS**

Dimensions: 47x14x5mm

Weight: 0.5kg

Tolerances on dimensions and weight are $\pm 2\%$. Due to continuous product development, product appearance may differ slightly from that shown in the photos.

CHARACTERISTICS

The cover is made of polyester fabric coated with a water-resistant PVC layer. The cover fastens with a zipper.

APPLICATION

The case is designed for proper protection, transport and storage of the torque wrench.

STORAGE AND MAINTENANCE

The harness should be stored in a manner that protects it from mechanical damage.

The harness should be stored in a dry place, away from heat sources, in a chemically non-aggressive atmosphere. Protect from sunlight.

The helmet harness should be cleaned after each use. Use a dry cloth to clean. If the sweatbands are very dirty or sweaty, hand wash them at a temperature not exceeding 40°C and dry thoroughly, or replace them with new ones.

EXAMINATION

Before placing the torque wrench in its case, remove any dirt. Periodic inspections, consisting of visual inspections, should be performed once a year.

The inspection includes checking:

- o the exterior and interior surfaces of the case; the surfaces should be clean, free from abrasions or other visible defects,
- o the zipper

A case that is damaged, heavily worn, or dirty should not be used to transport the torque wrench. If it becomes damp (especially on the interior surface), the case should be thoroughly dried before placing the torque wrench inside

Protective case for storing a torque wrench**FREQUENCY**

For check and periodic inspection to be carried out in according to table.

	CHECK	PERIODIC CONTROL
Who	User	Supervision
