

Storage bag for electrically insulating footwear**PHOTOS**

Dimensions: 380mm x 320mm x 405mm
Weight: 195g

Length and weight tolerances are $\pm 2\%$. Due to continuous product development, product appearance may differ slightly from that shown in the photos.

CHARACTERISTICS

This bag is made of polyester fabric for storing electrically insulating footwear. It features a drawstring closure at the top.

APPLICATION

The bag is designed for the protection, transport and proper storage of electrically insulating footwear.

STORAGE AND MAINTENANCE

The bag should be stored in a manner that protects it from mechanical damage. Store the bag in a dry place, away from heat sources, in a chemically non-aggressive atmosphere. Protect from sunlight.

To clean the bag, use a cloth dampened with water and a mild detergent. Dry the bag at a temperature not exceeding 50°C.

Storage bag for electrically insulating footwear**EXAMINATION**

Before each use, the bag should be inspected. Periodic inspections, including visual inspections, should be conducted once a year. The inspection should include checking:

- the outer and inner surfaces of the bag; the surfaces should be clean, free from abrasions or other visible defects,
- the condition of the drawstring.

A bag that is damaged, heavily worn (mechanical damage to the surface, tears, abrasions), or dirty should not be used to store electrically insulating footwear. If it becomes damp (especially on the inner surface), the bag should be thoroughly dried.

FREQUENCY TESTS

For check and periodic inspection to be carried out in according to table.
