SAFETY IN POWER

Tool and equipment storage sheet, 1.48 x 2.7 m**PHOTOS**Dimensions: (2700 x 1480) mm
Weight: 2280g

Tolerances on dimensions and weight are $\pm 2\%$. Due to continuous product development, product appearance may differ slightly from that shown in the photos.

CHARACTERISTICS

The tarp is made of polyester fabric, impregnated on one side with a layer of water-resistant laminate. Other sizes and a cover are available upon request.

APPLICATION

This tarp is designed for storing tools and equipment when working on overhead lines and distribution equipment. When unfolded at the worksite, it protects tools and equipment from moisture and dirt.

STORAGE AND MAINTENANCE

The case should be stored in a manner that protects it from mechanical damage. Store the case in a dry place, away from heat sources, in a non-chemically aggressive atmosphere. Protect from sunlight.

The case should be cleaned after each use. To clean, use a cloth dampened with water and a mild detergent. Dry at a temperature not exceeding 50°C.

Tool and equipment storage sheet, 1.48 x 2.7 m**EXAMINATION**

Before each use, carry out a visual inspection of the transport bags. Periodic inspections, including visual inspections, should be performed once a year.

The inspection includes checking:

- for any visible damage to the tarp's surface. A damaged, heavily worn, or dirty case should not be used to transport tools for work under voltage.

If the case becomes damp (especially on the internal surface), it should be thoroughly dried before use.

FREQUENCY

For check and periodic inspection to be carried out in according to table.

	CHECK	PERIODIC CONTROL
Who	User	Supervision
When	Before each use	Once a year*
How	Visually (visual inspection)	Visually (visual inspection)

*Unless instructions say otherwise
